To assure quality temperature, all food must be placed in tested temperature control containers, then placed in an insulated container for delivery. No sacks or boxes can be used to deliver the meal. If routes are taking longer than 45 minutes due to weather or other conditions, the route needs to be shortened with only a few meals sent out at a time or divided into multiple routes.

Nutrients that must be considered are protein, calcium, iron, folate, fiber, fat, zinc, magnesium, sodium, vitamin A, vitamin C, vitamin B12, vitamin B6, vitamin k, thiamin, riboflavin, and niacin. Menu planning will be designed to include a variety of foods, color texture and contrast; avoiding excess fat, saturated fats and cholesterol; including foods with complex carbohydrates and fiber; avoiding excess refined carbohydrates (sugar); avoiding excessive sodium. To assure that meals meet the United States Department of Agriculture guidelines for senior nutrition they must be approved by a Registered Dietitian.

MARCH 15TH FOR APRIL, MAY & JUNE

- C. **Food Substitution.** Each meal will be served as originally planned. If the meal cannot be served or is unacceptable to the participants, it must be brought to the attention of the Nutrition Program Coordinator and Registered Dietitian. Food substitutions must receive prior approval by the Nutrition Program Coordinator. Any deviation from the reviewed menu pattern must be documented and filed. Substitutions must be held to a minimum.
- D. **Special Menu and Therapeutic Diets.** Any overly restrictive or multiple restriction diet prescriptions are discouraged. Contractors wishing to provide dietary modifications to meet the needs of health, religious or ethnic needs shall do so under the guidance of a Registered Dietitian. Upon request by an eligible meal participant, cultural and ethnic menus may be considered to help encourage targeted

groups of older persons to participate in the nutrition program. The Contractor may not ask or require participants to absorb the added costs (if any) of having special menus.

E. Meal Pattern.

It is the recommendation of MAAA and the policy of the State of Nebraska that the following factors must be considered when menus are planned.

A food identified in one food group category cannot be repeated and counted as a food in another food group category (i.e., a fruit identified as a dessert must not be counted toward the three servings of vegetables/fruits).

All foods must be specifically and precisely identified so that the nutritional content can be properly evaluated. For example, listing "fruit in season" does not provide enough information to accurately determine the nutritional content of the menu.

There should be no duplicates during any one-week period with the exception of bread, milk products and potatoes.

Menus are required to be approved by a registered dietitian to assure that they meet the daily nutrient requirements of 1/3 the Dietary Reference Intakes for the following nutrients:

- Protein – 22 grams per meal
- Fiber -10 grams per meal
- Vitamin A – 300 ug per meal
- Vitamin C – 30 mg per meal
- Folate – 133 mg per meal
- Calcium – 400 mg per meal
- Iron – 3 grams per meal
- Potassium – 1,566 mg per meal
- Sodium –1000 mg or less per meal

Nutrient content must be met for each menu but the following **minimums** must be served:

- Main entrée shall be no less than 3 ounces of edible protein.
- 1 ½ cup of fruit and or vegetables.
- Two 1 oz servings of bread items –this can be met in the following ways:
- 1 ½-2 oz high fiber bread roll / bread--- homemade or home baked.
- bread alternatives (pasta and / or rice) along with 1 oz bread
- nutrient dense bread desserts along with 1 oz bread
- sandwich item that contains 2 oz bread as 2 slices of bread or 1 bun □ 8 oz of milk.
- 1 tsp margarine

Accompaniments will need to be added to the menu for appeal and participant satisfaction, e.g., coffee, tea, water, condiments, additional margarine, ketchup, mustard, sour cream, mayonnaise, tartar sauce, salad dressing, etc.

PERFORMANCE ACCOUNTABILITY. MAAA places an emphasis on accountability and performance measures to demonstrate service and or program efficiency, effectiveness and quality. Prospective Bidders that repeatedly are in non-compliance of performance accountability (raw food, minutes per meal, quality of product, etc.) may jeopardize their opportunity to receive reimbursement increases and or additional funding.

PORTION CONTROL. Prevents not having enough food at serving time, eliminates waste and assures the recommended quantity to each participant. Any MAAA staff member may check portions when they are at the senior center on any given day. If the appropriate portion does not meet all recommendations each Prospective Bidders will receive one written warning per fiscal year. After the written warning, if portions are not met, funding will not be provided for all meals served on that particular day.

FOOD QUALITY. In the context of food production, quality refers to a product's taste, texture, appearance, color, variety, nutritional value and overall level of excellence. To achieve an excellent finished product each time the following should be adhered to:

- Do not overcook foods. Prepare and cook foods to enhance flavor and to maintain color and texture.
- Prepare different types of food for each meal (Example: chicken, ham, roast beef, etc.).
- Use different methods of food preparation (Example: baking, boiling, steaming, etc.) ▪ Use a variety of textures (Example: mashed potatoes and carrot sticks).
- Two colorful food items will be used in each meal (Example: green beans and peaches).
- Garnishes can and should be used to add color and to “dress up” the food item (Example: whip topping on apple crisp; nutmeg on custards, etc.).
- Serve fruits, custards, puddings, etc. chilled.
- Use herbs and spices to enhance flavors. (Example: nutmeg, garlic or onion powder, parsley flakes, etc.)
- Use only good quality foods.
- Serve hot foods at 140 degrees F or above and cold foods at 40 degrees F or below.

The minimum standard of food to be used by the Prospective Bidder will include:

- Canned fruit and vegetable - USDA Grade A.
- Fresh fruit and vegetables - No. 1 quality.
- Poultry - USDA Grade A or better.
- Beef - USDA Choice or better. Ground beef should be no more than 20% fat content.
